

THE VICTORIA PRACTICE TRAVEL CLINIC

For patients planning foreign travel for leisure purposes, the Victoria Practice offers medical services via the travel clinic.

Many diseases can be contracted from foreign travel and as more people travel abroad, especially to remote destinations, it is becoming common to see travel related illnesses presenting. Many of these infectious diseases can be avoided by taking simple preventative measures or with immunisation.

PROCEDURE FOR TRAVEL CLINIC

1. [FILL IN THE ACCOMPANYING FORM](#) as fully as possible and return it to the Health Centre. (Please use one form for each family member travelling).
2. [CONTACT THE VICTORIA PRACTICE AFTER 1 WEEK.](#) You will be advised which vaccines you require and which can be administered at our Travel clinic and which need to be done through a private travel clinic
3. [ATTEND YOUR CLINIC APPOINTMENT](#) where the Practice nurse will administer any immunisations and discuss relevant health issues relating to your travel.

HOW CAN YOU HELP

It is especially important that we know your proposed accommodation and destinations within a particular country – and of any previous immunisations, which you have had outwith the Health Centre, which may not be in your current medical notes.

The distribution of various diseases around the world is constantly changing, and resistance to anti-malaria drugs is becoming troublesome in certain countries, so even if you have travelled to a particular country before and think you are already covered, please let us check for you. We have access via a computer link to TRAVAX which provides us with up to date travel information from the Travel medicine team of Health Protection Scotland. You can also access a comparable site designed for the traveling public at www.fitfortravel.nhs.uk.

TIME SCALE

The earlier that you can tell us of your travel plans, the easier it is for us to help you. Some immunisations e.g. against hepatitis A take several weeks until they start to provide protection and some immunisations can not be given within 3 weeks of each other. Yellow fever has to be given at a designated yellow fever centre. Malaria prophylaxis usually needs to be started at least a week before travel. Please allow yourself enough time. **If you are travelling in less than 6 weeks** we may suggest you attend a private travel clinic as it can be difficult for us to accommodate complicated vaccination regimes in a restricted time frame.

CHARGES

Hepatitis A, Typhoid, Diphtheria, tetanus and polio are stocked by the surgery and will be administered without a charge. Certain vaccinations cannot be provided by the NHS and if you require any such vaccines we ask that you make arrangements through a private travel clinic or a local pharmacy. This includes anti-malaria drugs.

WE CANNOT PROVIDE TRAVEL ADVICE OR IMMUNISATIONS IF THEY ARE REQUIRED FOR WORKING ABROAD. THIS SHOULD BE ARRANGED THROUGH OCCUPATIONAL HEALTH OR PRIVATE TRAVEL CLINICS.

THE VICTORIA PRACTICE TRAVEL FORM

Please complete this page of information as accurately as possible.
Use a separate form for each person.

Name Date of Birth

Address
..... Daytime telephone number

ABOUT YOUR TRAVEL DESTINATION

Which countries do you intend to visit?

If possible state exact location/town
